

RetinaAI Screening Report

Clinical review support - not a diagnostic medical device

Patient ID: Unspecified

Date: 2026-07-02T07:42:38

Quality

accepted

Prediction

Moderate DR

Confidence

0.327

Quality Metrics

Blur: 460.610 | Brightness: 31.433 | Contrast: 31.428 | Retina visibility: 0.801

Quality gate reasons: none

Prediction and Uncertainty

Prediction status: available

Severity class: Moderate DR

Predictive entropy: 1.539 | Top-2 margin: 0.096

Manual review required: True

Routing reason: low_confidence,high_entropy,low_top2_margin

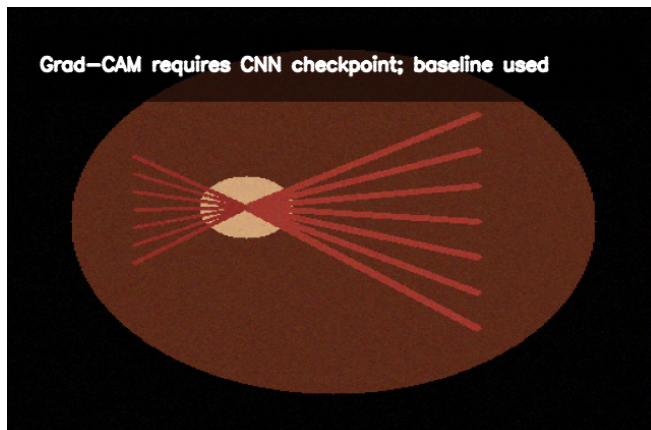

Class probabilities: [0.231279, 0.108721, 0.32696, 0.14304, 0.19]

Recommendation

Model confidence or uncertainty thresholds require qualified clinical review before any care decision.

Urgency: manual review

Grad-CAM / Explanation

Medical Disclaimer

This AI output is a screening prototype and is not a medical diagnosis. Clinical diagnosis requires review by a qualified medical professional.

This report supports screening workflow triage only. A qualified clinician must review the patient, source image, model output, uncertainty values, and any additional clinical data.
